Compact Construction Equipment Product Line

Large Inventory of New & Used Equipment and Work Tools

Introducing the NEW Compact Track Loaders (CTL) 279C ~ 289C ~ 299C

The Compact Track Loaders from Cat have durable, aggressive steel embed track and steel undercarriage components for maximum life in applications where maintenance, operator technique and underfoot conditions may not be ideally suited for an MTL. Applications such as rental or sites with sticky, rocky soils where material packing in the undercarriage poses a problem.

Some Key Features of the new CTLs:

- Caterpillar designed & manufactured
- Only fully suspended CTL on market: a four independent torsion axle suspension system - Best riding CTL on the market
- 2 speed standard: fastest CTL with max speed of 8.5 mph
- Longer track on the ground: higher flotation, traction, lower ground pressure and longer track life
- Exclusive Caterpillar drive motor seal guard: same design used on Cat dozers, extends the life of the seal and final drives
- EH drive motors: take advantage of all C series features including straight-line tracking and electronic torque management
